EARMUFFS

with Bluetooth & Situational Awareness Technology

SMART SENSE

Safely hear your environment!

2m IPX4 25h

KLEIN TOOLS®

SITUATIONAL AWARENESS EARMUFFS

Klein Tools AESEM1S Earmuffs are engineered to incorporate both Situational Awareness and Bluetooth technologies – allowing users to stay connected to their surrounding environment as well as music. The dual-knob design featuring unique grooves for easy identification enables users to precisely adjust their Situational Awareness or Bluetooth volumes. Ergonomically designed vented headband provides cool comfort for all-day wear. These earmuffs charge in two hours, providing up to 25+ hours of runtime.

SMART SENSE

Keeps you connected to your environment by compressing high impulse, impact or constant sounds down to a safe level (of 85dB), while low level sounds are amplified to improve communication helping you catch every word. Additionally, the dual omni-directional microphones provide 360 degrees of awareness, assisting in pinpointing exact noise locations.

Includes charging cord and Klein carrying pouch
